Complete Disinfectant Solution List

“

"infected" co-workers  
spread the virus to  
50% of workplace  
surfaces within 4  
hours of arriving at  
work; thanks to shared  
contact with those  
surfaces, half of their  
co-workers also tested  
positive for the viruses.

Kelly Reynolds PhD,  
a professor and environmental  
microbiologist at the University of Arizona.

# LUX ELECTROSTATIC

Electrostatic sprayers apply a positive attractive charge to the cleaning solution as it's being sprayed, magnetizing it so that it adheres to every surface. This positive charge attracts to the negatively charged surfaces, covering above, under and around every corner of your space.

For many high touch or high traffic areas, regular disinfecting is hard to maintain which is why these sprayers are such a crucial asset. They are affordable, easy-to-use, and provide quick coverage to spaces, large and small.

This technology, used to sterilize offices, restaurants, universities and public transportation,

## Lux Back Pack / Cart
