

HELP PREVENT THE SPREAD

Split!

Split! removes tough soil, bio-film, and even old detergent residues, leaving nothing behind to attract more dirt.

SIMIX

Simix Multi-Surface Ceramic Coating can be used on virtually any hard surface. Simix Multi-Surface Coating gives surfaces a safe, permanent high pH that resists the spread of microbes and viruses. Simix Multi-Surface Coating is hypoallergenic and fragrance-free.

SPLIT!

Clean with Split! Non-Detergent Cleaner

SIMIX

Add a protective coating with Simix

The combination of the two will create a safer environment. Split! works by completely ridding the surface of germs and viruses. Followed by covering the surface with SIMIX Ceramic Coating, which will prevent germs & viruses from sticking to the surface. Creating a long term, clean surface.
